### BRIEF INFORMATION ABOUT THE ACTIVITY (CRITERION NO. II, III, VII):

TOPIC/SUBJECT OF THE ACTIVITY	Wall Magazine
OBJECTIVES	Opportunity for the students to express a scientific theme/discoveries through creative design. Every year a new theme is introduced to enhance the student learning process.
METHODOLOGY	Students use 3D designs, creative tools, pictures and art supplies to create a theme board.
OUTCOMES	<b>Theme: EPIGENETICS- It's not just genes that make us</b> Epigenetics is an area where our scientific knowledge is rapidly increasing. From the study of strange patterns of inheritance such as genetic imprinting, the status of queen bee, the evolutionary history of dogs and wolves and other related phenomena have uncovered a whole new layer of information that lies "on top" of the DNA sequence of our genes. In nutshell, epigenetics is the study of characteristics or "phenotypes" that do not involve changes in the DNA sequence. It is about how genes are expressed and used, rather than DNA sequence of the genes. Two chemical tags, methyl and acetyl groups are central to epigenetic phenomena, which regulate genes to be switched on or off over time.
