### BRIEF INFORMATION ABOUT THE ACTIVITY (CRITERION NO. I, II, III, VII):

TOPIC/SUBJECT OF THE ACTIVITY	<b>Student Internship Seminars</b> – A Presentation of Summer Research Internship Reports
OBJECTIVES	As an extension of academic curricula, students visit premier research institutes/ laboratories/ Industries for short term research internships with the purpose of obtaining relevant research experience under an external mentor. The duration of these internships range from 4-8 weeks (mostly during summer vacations). Some of these are independent placements but most require teacher recommendations. For students to make the most of these summer internships, a seminar series was introduced for all students who had done internships to present their data and explain their findings. The overall objective was to teach skills pertaining to making presentations using ICT tools and presenting before peers and faculty of the department.
METHODOLOGY	Open successful completions of their respective internships A schedule was prepared and students were given ample time to prepare their presentations. On the day of the seminar, students were expected to share their internship experience in terms of their research output and understanding. The audience actively participated by asking questions.
OUTCOMES	The student learning outcomes from such an exercise were multifaceted. Not only did the presenter learn how to do make the presentations using ICT tools, how to present data scientifically but they also learnt the skill of public presentation and defense of their work through Q&A from the audience. These seminar series also served as an eye opener to the junior batches and motivated them to go for similar internships and get research exposure.
