1. Background:

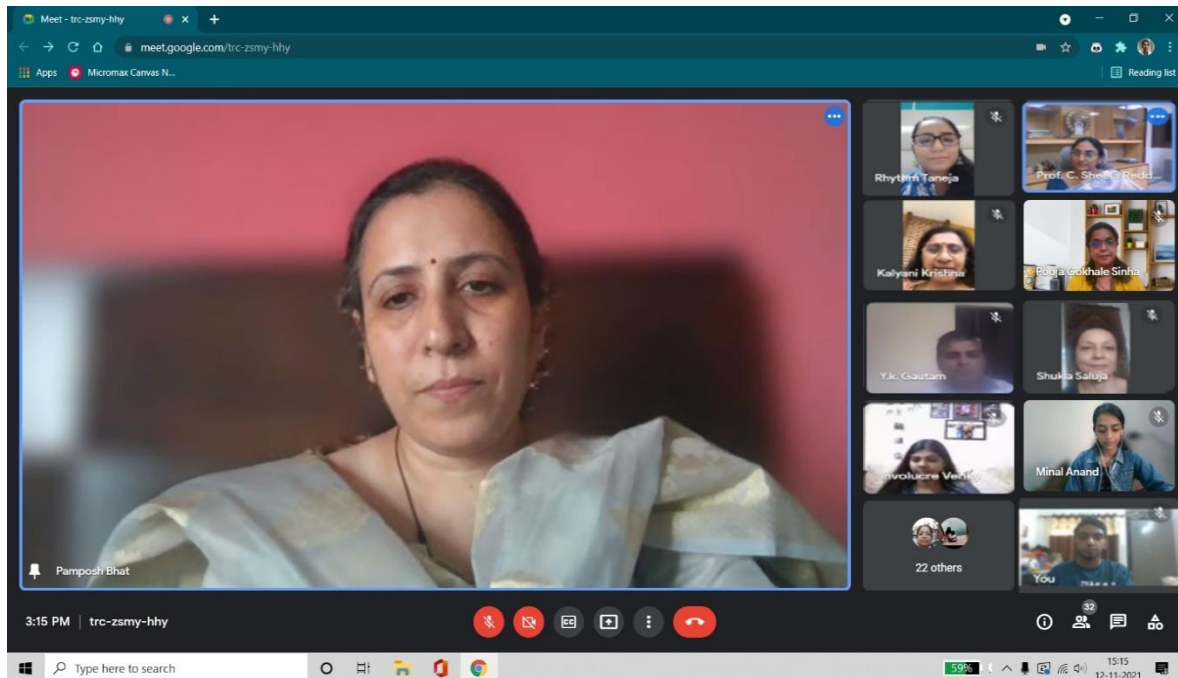

An inaugural lecture for Involucre, Botanical society, Sri Venkateswara College, was organised on 12th November, 2021. Dr. Pamposh Bhat, Assistant Professor, University School of Environment Management, Indraprastha University was the chief guest and held a talk on “Status of water pollution in Yamuna: recent advances in research methodology”.

Due to COVID-19 restrictions the whole event was held virtually on google meet platform. The event commenced at 3 p.m. and was concluded by 5 p.m. Second- and third-year students of B.Sc. (Hons) Botany course participated in this event. Our principal, Prof. C. Sheela Reddy graced the occasion with her presence during the event.

2. Reception and Event:

The event commenced with Saraswati Vandana, followed by an introduction to the department and its journey from its foundation to this diamond jubilee year of Sri Venkateswara College by Dr. Kalyani Krishna, convener. Then principal ma’am gave her warm greetings to the Involucre team and welcomed the guest speaker Dr. Pamposh Bhat. She also spoke a few words about the significance of Yamuna River and the need to protect its depleting health. Succeeding this, Dr. Shuka Saluja, teacher in charge, Department of Botany apprised everyone with the journey and achievements of the guest of honour.

Dr. Pamposh Bhat gave her wishes to the department and the college and specially thanked Dr. Pooja Gokhale Sinha, co-convener for organising this talk. She then delivered an interactive talk on “Status of water pollution in Yamuna: recent advances in research methodology”. She firstly gave a brief overview on Yamuna’s geography and biodiversity and then discussed the reasons for increasing pollution and depleting biodiversity. She also explained the role of ‘National River Conservation Directorate’ and ‘Yamuna Action Plan’. She shared her research about the river and, status of the wetlands and pointed urbanisation and industrialisation of Delhi as the main cause for depleting river health. She shared solutions to revive the rivers health; protecting wetlands, overexploitation of water by dams and aquifers, cleaning the river and sustainable development of infrastructure. Her lecture was followed by a question answer session in which students and teachers of the department participated enthusiastically.

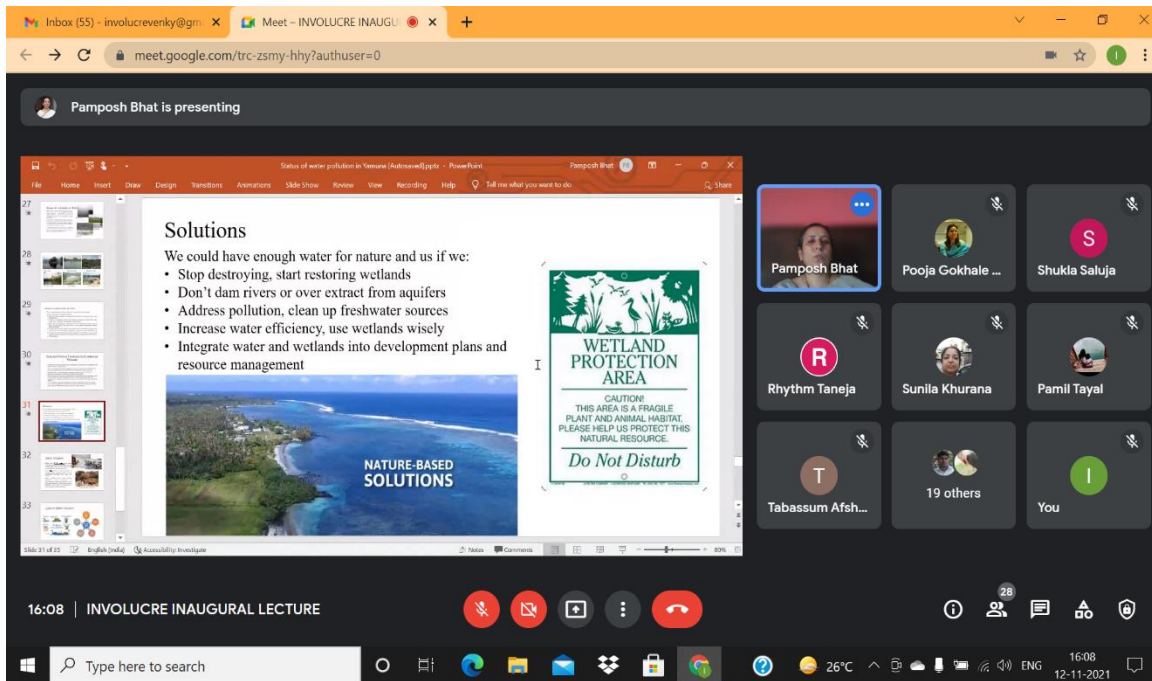

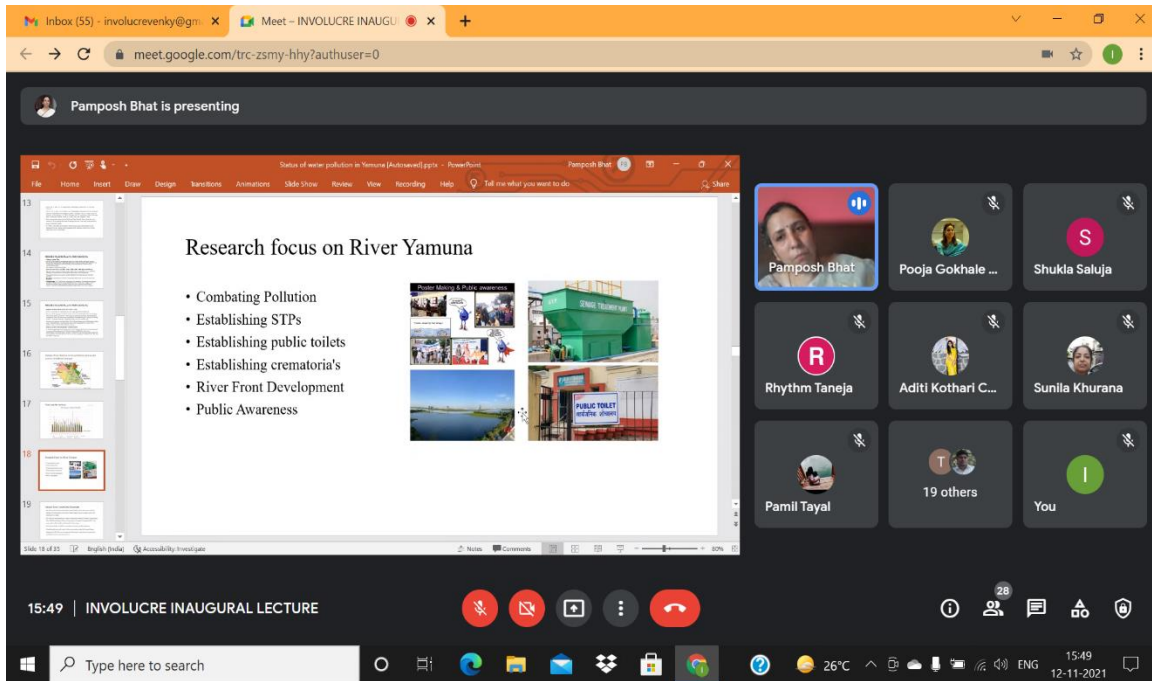

Dr. Pamposh Bhat, addressing the gathering

Students and Teachers of Sri Venkateswara College, along with their principal, Prof. C. Sheela Reddy

The online session was favoured by the audience. The event was thought-provoking and suitable considering the current situation. It was evident that the lecture piqued the audience's interest

as many questions were raised at the end. The audience consisted of the college's experienced staff and inquisitive students.

Dr. Pamposh Bhat, delivering the lecture with the help of her presentation

3. Future scope:

In spite of the event being conducted virtually, a positive response was observed. Involucere, the botanical society at Sri Venkateswara College has conducted many such sessions to spread awareness and disseminate valuable knowledge among the masses. It has done so in the past and will continue to do so in the future.
