REPORT

Rasagya, the Chemical Society, in association with the **IQAC, Criterion 2 of Sri Venkateswara College** organised a Quiz Competition on 6th January, 2023 for the 1st year Chemistry Hons. students, titled “**WAR OF CHEMTHINKERS**”.

The main objectives behind organising the quiz were: -

1. to **test Basic Concepts of Chemistry** of students
2. to **test Basic Aptitude and Logical Reasoning** of students
3. to **assess the Learning Levels of the students**

The event started with **Prof. Sharda Pasricha** and **Dr. Vinita Kapoor** giving the general instructions to the students on how to proceed with the quiz, time limit, marking, etc. Multiple Choice Questions were given in Google Form to each student with the help of Q.R. code scanning. It was a **one-hour quiz** comprising of **50 questions**, and the students seemed thrilled while dealing with the mind-boggling questions that were presented to them.

A total of **46 students participated** in the quiz, and received the Certificate of Participation. The Quiz Competition was very well organised and underwent accomplishment in a seamless manner. Students got an opportunity to put their skills to test, not only in chemistry, but also in general aptitude. The event also helped students assess their conceptual clarity through the scores that they received on completion of the quiz; hopefully **motivating them to focus on their weak areas**. They thoroughly enjoyed the process of attempting the online quiz.

Moreover, it is difficult to imagine science education without technology in the 21st century. The present-day students have grown with technology and internet. They know that technology makes life easier and more convenient, then why not their education too. **ICT, if used creatively, can make a big difference in the way teachers teach and students learn**. Timely feedback and quick result analysis can also be done easily which is otherwise time-consuming, if done manually.

Post the event, Prof. Sharda Pasricha and Dr. Vinita Kapoor **critically analysed the results** for **understanding the Learning levels of students** of the new batch. By carrying out this exercise for students right in the first semester, **teachers would be able to adopt different methodologies** to effectively assist both **advanced and slow learners** to excel in due course of time.

Another **very important purpose** underlying conducting such an event is to **make education a more Learner-Centric Approach**, not merely teaching students for the examination, not telling students to memorise facts to get 90%+ marks, because **every student learns in a different way**. **National Education Policy (NEP-2020)** is an education which shifts focus from examination and rote learning to **Conceptual Clarity, Critical Thinking, Problem Solving, Innovation and Creativity**. This event was also an attempt in conformity to the needs and goals of NEP-2020.

“If we teach today’s student as we taught yesterday’s, we rob them of tomorrow”
