Date: 11th January 2022

Circular

Sub: Webinar on 'Issues in Indian Agriculture'

I am glad to inform you that the Economics Association is organising second event in Calendar Year 2022 and in Even Semester 2021-22 on 15th January the details are given below.

Topic: 'Issues in Indian Agriculture'

The Speaker: Prof. Amarendra Reddy

Principal Scientist at ICAR-Centre Research Institute for Dryland Agriculture
Hyderabad, Telangana, India

Date: Saturday, 15th January

Time: 10.30 AM

About the Speaker

Prof. Amarendra Reddy is an Economist with focus on public policy. Prof Reddy regularly writes on issues in Indian Agriculture and policy choices in various national dailies. His past association includes Director(Monitoring and Evaluation); National Institute of Agricultural Extension Management (MANAGE), Principal Scientist (Agricultural Economics), SCIENTIST;CGIAR, Associate Professor (Public Policy) Administrative Staff College of India Etc.

3. This event is organised for the benefit of all students. A Google form <https://forms.gle/UjXT8aHdG38Cj4R8> is created for the registration for the event. The even shall be organised in the MS Teams meeting platform and we are generating attendance reports during and at the end. The EA members are putting tireless efforts to make it a very big success.

4. Your active participation shall motivate the organising committee for conducting several programmes. Since limited number of seats available you need to not just register immediately and also participate in the event. It is mandatory for All B.A (H) Economics & B.A (P) Economics Past and Present students to enrol and participate in it. An e-certificate of participation will be issued to all participants as per the need.

Thanking you in advance for your compliance.

Teacher-in-Charge

WEBINAR ON ISSUES IN INDIAN AGRICULTURE

On 15th January 2022, the Economics Association of Sri Venkateswara College hosted a webinar on 'Issues in Indian Agriculture'. Our esteemed guest speaker for the session was Dr. A. Amarendra Reddy, Principal Scientist, Indian Council of Agricultural Research (ICAR).

The event began with words of welcome by our Vice Principal Dr. Venkata Kumar who was just as interested as the students, to learn about the solutions to various issues in the agriculture industry. The General Secretary, Araba Kongbam commenced the session by giving a brief introduction about the speaker, and teacher in-charge Dr. Brahma Reddy welcomed the participating audience.

Dr. A Reddy started the lecture by highlighting the significance of the agitation of farmers from Haryana and Punjab. He further talked about the new Farm Laws and their aim of liberalization of the agriculture industry, with greater participation from the private sector and mentioned the state of MSP and APMC markets and the farmers' demand to put 23 crops under them, not only paddy and wheat. The exclusionary policies are the reason for the problems faced by farmers, some of which can be resolved using the MSP as a tool. However, some economists argue that it is too costly to implement.

Next, he talked about the low income of farmers in our country. The main reasons behind their woes is the growing cost of agriculture and low investment in the sector. The farmers are still dependent on MSP which only applies to paddy and wheat. This led us to talk about the discrepancy in MSP and APMC markets. The problem with MSP is that even if it is restricted to two crops, procurement of grains is only taking place in well-to-do states of Punjab and Haryana. Meanwhile, other states that produce these crops do not get the benefit.

In APMC markets, there is non-uniformity in charging of regulation fees which is a high percentage of the price. It should be brought down to about 2% in all the states. Sir added that the procurement policy is biased towards oil seeds and other crops, and only 6-10% of the production is procured against the 90% of wheat and paddy.

We are spending around 70,000 crores in import bill due to negligence of oil seeds and pulses. There has been a long period of agricultural policy paralysis from the famines of 1943, which led the government to introduce acts like essential commodities act in 1940-50s, formation of APMC, FCI, STC of India leading to reduction of private participation. But in the 1980s there was a 30-40% surplus and a need to increase competitiveness and income of the farmers which required investment in transportation and storage.

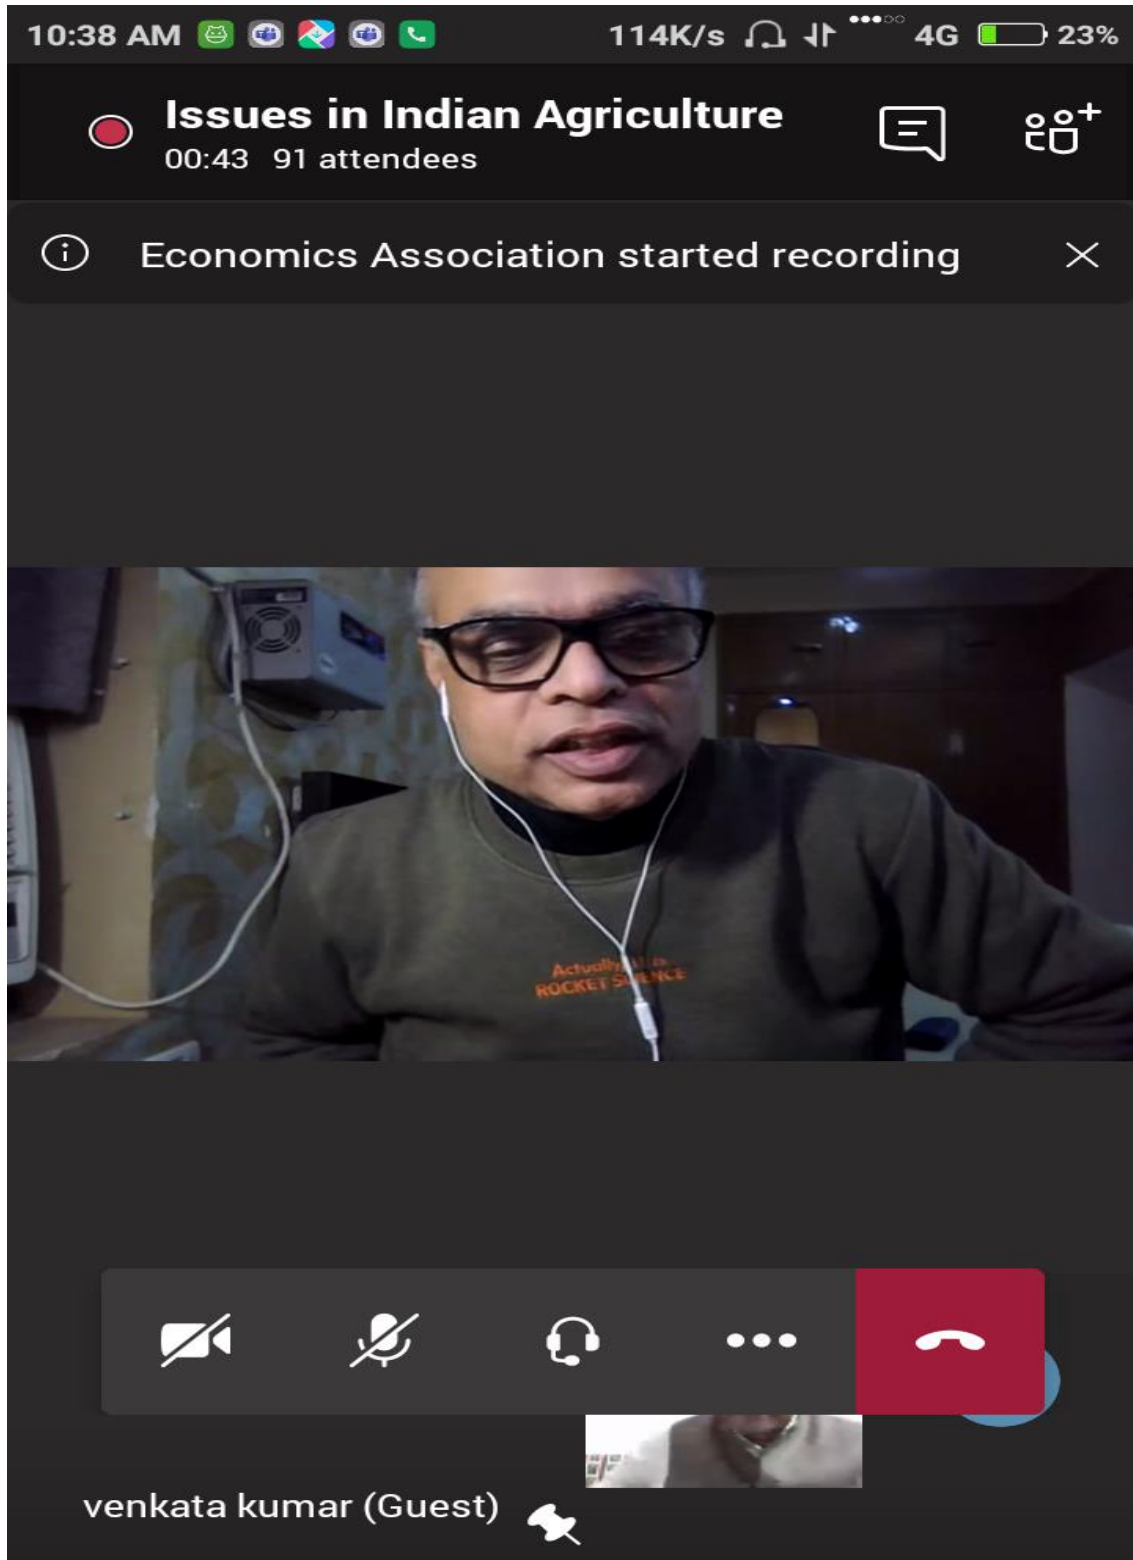

In the 1990s the industrial sector was liberated but not the agricultural sector due to political opposition, which led to high cost of intermediation, high retail margins,

wastage of grains and stagnant agricultural markets. The system is highly controlled by the government with no private storage, stagnant prices and inefficient trading.

Dr. Reddy concluded by saying that the new farm laws were meant to achieve the objectives of a one nation-one market, barrier-free interstate market, private participation and freedom of farmers. But before making the agricultural sector liberalized , we need to encourage FPOs (farmer-producer organizations), strengthen APMC markets, expand eNAM and adopt an efficient price information system.

The session was followed by a QnA session, and Dr Reddy patiently answered multiple questions pertaining to India's agricultural system, and the current impact of government policies. Finally, the enriching session was concluded with words of gratitude from Dr. Brahma Reddy sir for his time.

Font Paragraph Drawing Editing

Stagnant agricultural markets

- APMCs under state control and regulated
- Monopsonistic power
- Market fee, CESS, Commission
- ECA stock limits
- Suppression of market signals, revert to imports in scarcity
- No private storage_T
- Low post-harvest infrastructure/under-investments in APMCs- high wastage (35%)
- Govt is not efficient in private trade
- Price stability =f(storage, processing)= f(price signals, market intelligence)
- Mandi price rigged, farmers did not have choice
- Harvest prices crashing and off-season prices sky rocketing (regular phenomenon) which feeds in to local politicians.
- 90% trade is in petty private sector, but laws distorted price signals

Edible oils

Crop	Average sale price
Soybean	6-15% less than MSP
Groundnut	25-40% less than MSP
Sunflower	35% less than MSP
Mustard	15-20% less than MSP

Edible oil: imports vs domestic production (mt)

Oil Check

- Annual consumption: **23.5 million tonnes**
- Import of edible oil: **15 million tonnes**
- Domestic production: **8.5 million tonnes**
- Domestic refining capacity: **30 million tonnes**
- Utilisation: **45%**
