SUMMARY

The event UI/UX with Figma was a learning session covering various aspects of web and mobile application designing. The UI/UX Design workshop was a great success, providing attendees with valuable insights and networking opportunities. The event showcased the latest trends and best practices in UI/UX design, and the design challenge was a great way to engage attendees and showcase their skills.

This event was guided by Dr. Nutan Joshi, Teacher-in-Charge of the Department of Electronics, Dr. Rakhi Narang, Teacher Coordinator and successfully conducted by Pragath, Praveen, and Satvik, Student Coordinators.

The speaker was Manya Kaushik III year student, Dept. of Electronics of this event. She conducted the workshop explaining the basic designing tools of Figma.

UI/UX with Figma

UI - User Interface Design – aesthetics, visuals of any application or website. For example, the color selection, typography, interactions, animation, pop ups, drop downs.
UX - User Experience Design – it is how it works, its functionality/working. It takes care of how the users feel, their overall experience. User research, testing the product, information architecture, user journey/persona of people, understanding their needs and building according to that. Basically, how well it serves the purpose of a particular task while using a product.
(glass bottle, coke can, waiting time example)
Both are required to build any product, as they work together.
Graphic design : Designs visual elements,Brand-centric, logos, campaigns marketing posters etc, anything that is conveying one single thought and is static.
