

2022 SCIENCE CASE STUDY COMPETITION

Groundwater in India is decreasing because of growing urban estates, multiple cropping patterns and excessive water use for irrigation/agriculture – What is the solution for the future?

This case study competition is an opportunity for the brightest undergraduate students from universities across India to compete to solve a critical issue facing India.

Teams of 2-4 students will participate in preparing a response to a case study prepared by academics from The Australian National University. Entry is free.

Prizes

1st prize: ₹ 1,00,000 gift card

2nd prize: ₹ 50,000 gift card

3rd prize: ₹ 25,000 gift card
