- 1. India's External Sector Overview: Anusha Katyal's presentation on "India's External Sector" highlighted the key performance indicators (KPIs) and significant developments in India's external sector during the last financial year. Despite global tensions, the data indicated a stable external environment for India. Key shock absorbers—such as forex reserves, sustainable external debt levels, and a market-determined exchange rate—helped cushion the economy against global challenges.
- 2. India's Economic Performance in FY 2024: A presentation on the current dtate of the economy was carried out by Guransh Singh Bhatia and Vendansh Lamba. In fiscal year 2024, India's economy grew by 8.2%, demonstrating resilience amid global challenges. This growth was driven by robust domestic consumption, increased public infrastructure spending, and targeted reforms. The fiscal deficit was reduced to 5.6% of GDP, with inflation moderated to 5.4%. The services sector remained the largest contributor, and the health of the banking sector improved. Increased labor force participation, particularly among women, supported poverty reduction. The outlook for the coming year remains cautiously optimistic, with projected growth between 6.5-7%.
- 3. India's Growth in Amrit Kaal: A comprehensive analysis of India's growth trend over the past 60 years was conducted by Krsna Varadpande and Sriram Senthilkumar, focusing on key drivers and schemes like the Production-Linked Incentive (PLI) scheme mentioned in the 2022-23 Economic Survey. The study examined the effectiveness of these initiatives in boosting economic output and suggested alternative sectors for future government focus to sustain growth during Amrit Kaal.
- 4. India's Vision 2047: Path to a Developed Nation: The report outlines India's strategic plan to achieve developed nation status by 2047, emphasizing sustainable and inclusive growth in health, education, housing, and technology. It notes substantial economic progress, with increased GDP and significant investments in social sectors like education and healthcare. Initiatives such as the Aspirational Districts Programme (ADP) aim to improve service delivery, while reforms under the National Education Policy (NEP) 2020 focus on literacy, vocational training, and higher education to reduce poverty and inequality. Digital transformation and corporate social responsibility are also highlighted as key factors in driving welfare and development. The presentation was carried out by Niachay Narula

ECONOMICS ASSOCIATION SRI VENKATESWARA COLLEGE

invites you to a

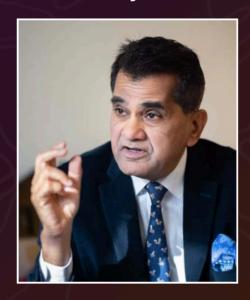

Symposium in memory of

Cheistha Kochhar

Inaugural lecture on

WHAT WILL IT TAKE INDIA TO BECOME AN ECONOMIC SUPERPOWER

By
