### **SUMMARY :**

The seminar was held with the idea of enforcing the concept of safeguarding the products created by the human intellect. This includes patents, copyrights, design, trademarks etc. Since students and of course faculty members shall create many such products in the coming years, they learnt how they could retain the rights of their creations and benefit from them. The speaker explained the various aspects of IPR in simple language and with the aid of props. She engaged the students effectively and encouraged them to ask questions. The event was well-attended, interactive and well-received.
