<b>FINANCIAL SUPPORT/ASSISTANCE (if any):</b>	NA		

**BRIEF INFORMATION ABOUT THE ACTIVITY**

<b>TOPIC/SUBJECT OF THE ACTIVITY</b>	<b>OC-DETECT</b>
<b>OBJECTIVES</b>	This is a mobile health app designed to help create awareness about early detection of oral cancer
<b>METHODOLOGY</b>	The goal of launching this app is to develop an mHealth platform called OC-DETECT using a user-centred design process to define and refine the platform's features and design. This is done based on feedback from discussions with various stakeholders (e.g., young people, individuals at risk of oral cancer or cancer survivors, family members of at-risk individuals or oral cancer survivors, physicians, nurses, and community health workers).
<b>INVITED SPEAKERS WITH AFFILIATION DETAILS (IF ANY)</b>	Ms. Mariam Siddiqui Senior Public Health Researcher RTI International, India
<b>OUTCOMES</b>	The session was aimed at explaining to the students how this app, once ready, would facilitate the exercise of identifying patients of oral cancer in early stages of the disease. To be able to use the app, input was taken from the students as to how the mHealth app would work and to assess if its features were user friendly. The student response was very useful and they made several pertinent suggestions during the interaction.
