SUMMARY

An educational visit to the **National Zoological Park, New Delhi**, was organized on **17 April 2026** for the Fourth-Year B.Sc. Zoology students as part of their academic curriculum.

The primary objective of the visit was to provide students with practical exposure to ex-situ conservation strategies and to study animals belonging to different classes in their respective enclosures, with particular emphasis on their habitat requirements, living conditions and behavioural patterns. The visit also aimed to help students understand the practical applications of concepts related to wildlife conservation, ecosystems, habitats, animal behaviour, feeding habits, veterinary care, wildlife rescue and public awareness.

The students assembled at the entrance of the National Zoological Park at 9:30 AM. Following the entry formalities, the group proceeded into the zoo and visited various animal enclosures. During the visit, the students observed animals belonging to different zoological classes and gained valuable insights into their characteristic features, behavioural patterns, feeding habits and adaptations to their respective environments. The visit provided an opportunity to correlate theoretical knowledge acquired in the classroom with practical observations and to appreciate the importance of wildlife conservation and animal welfare.
