BRIEF INFORMATION ABOUT THE ACTIVITY

TOPIC/SUBJECT OF THE ACTIVITY	Educational Trip to the National Institute of Food Technology Entrepreneurship and Management, Kundli, Haryana
OBJECTIVES	The primary objective of the departmental trip to NIFTEM was to provide students with a practical understanding of food technology and entrepreneurship through an immersive experience at the institute's state-of-the-art facilities.
METHODOLOGY	Students collected data during the trip, and specifics regarding various pilot plants and fortification units were given. Students were invited to visit the food testing lab and microbiology research labs.
INVITED SPEAKERS WITH AFFILIATION DETAILS (IF ANY)	
OUTCOMES	The trip to NIFTEM really helped students understand how food is made and how they can start their own food businesses. Learning about leasing machines for their own use was interesting. Engagement with food testing labs and research initiatives broadened students' perspectives, fostering informed decision-making and facilitating valuable networking opportunities with industry professionals. Overall, the trip significantly enriched students' knowledge and prepared them for the practical challenges of the food technology field.

REPORT

The academic trip to the National Institute of Food Technology Entrepreneurship and Management (NIFTEM) proved instrumental in providing us a comprehensive and applied understanding of contemporary food processing technologies and entrepreneurial avenues. The itinerary featured an exhaustive exploration of production intricacies, encompassing Ready-to-Eat (RTE) protocols and the procedures inherent in bakery and namkin manufacturing. An in-depth examination of specialized machinery, with a particular emphasis on the feasibility of leasing equipment, provided a nuanced comprehension of practical applications within the food industry.

We further extended to an exploration of food testing laboratories, shedding light on rigorous testing protocols, and exposure to ongoing research initiatives. This facet not only broadened our perspectives on the research landscape but also underscored the integral role of empirical investigations in the food technology domain.

In addition to the technical insights gained, this departmental trip facilitated valuable networking opportunities through interactions with industry professionals and NIFTEM experts. Such engagements not only enriched the experiential learning component but also provided us with a direct interface with prevailing industry practices and challenges.

We also observed the research labs in the campus like the microbiology research lab where we were given the aspects of proper cell culture laboratory. The PI also described the opportunities of joining the lab as a research intern.

In summation, the trip NIFTEM emerged as an educative experience, combining theoretical knowledge with practical applications. It not only deepened students' understanding of food technology but also equipped them with a holistic perspective necessary for prospective roles within the dynamic and multifaceted food industry.
