## REPORT

Youth India Foundation, Sri Venkateswara College, successfully organized **Bid & Build: AI Edition — an AI & Entrepreneurship Auction Case Competition**, designed to provide participants with a dynamic and immersive experience in building AI-driven ventures. The competition began with an online screening round to shortlist participants, followed by an engaging offline event structured into multiple rounds. In the auction round, teams strategically bid for industries and essential resources within a fixed budget, simulating real-world market selection and investment decisions. This was followed by a startup pitch round, where participants developed innovative AI-based business models, integrating their acquired resources to address real-world problems with scalable solutions. The final ethical dilemma round challenged teams to critically evaluate the societal impact of their innovations and make responsible decisions under complex scenarios. The competition enabled students to apply theoretical knowledge in a practical setting, enhancing their strategic thinking, problem-solving, and decision-making skills. It also fostered a deeper understanding of innovation, resource optimization, and ethical considerations in AI, inspiring participants to approach entrepreneurship with a structured, responsible, and forward-thinking mindset.
