Answers to Frequently Asked Questions

What does the GMAT exam measure?

The GMAT exam measures basic verbal, mathematical, analytical writing, and integrated reasoning skills that you have developed over a long period of time in your education and work. The *Integrated Reasoning* section requires candidates to interpret and analyze information from different sources and in a variety of formats to solve complex reasoning tasks. The *Verbal* section measures your ability to understand and evaluate what you read, as well as your ability to recognize basic conventions of standard written English. The *Quantitative* section tests quantitative reasoning ability. The *Analytical Writing Assessment* section measures your ability to think critically and communicate complex ideas in writing. Your GMAT scores should not be compared with other test scores. Although the GMAT score scales may resemble those used for other tests, the scores are not directly related.

What doesn't the GMAT exam measure?

It does not measure your knowledge of business, your job skills, or subjective qualities such as motivation, creativity, and interpersonal skills. If a test taker's first language is not English, he or she may still perform well on the exam; however, the GMAT exam may not accurately reflect the abilities of someone who is not proficient in English.

How are the Analytical Writing Assessment scores used?

The Analytical Writing Assessment is used to provide an independent ranking of your ability to think critically and to communicate clearly when writing in English. Writing scores are computed separately from the scores for the multiple-choice sections of the test and have no effect on the Verbal, Quantitative, or Total scores.

What do GMAT scores predict?

GMAT scores are a valid predictor of academic performance in the first year of a graduate management program. Since creating the GMAT exam 50 years ago, we have conducted hundreds of validity studies that demonstrate this fact. In the past ten years, we've conducted almost 300 studies for graduate management programs all over the world. The median correlation between GMAT scores and first-year grades was 0.51 (perfect correlation is 1.0). The median correlation between undergraduate grade point average and first-year grades was 0.28. Thus, GMAT scores are generally a better predictor of performance in the first year of business school than undergraduate grades, though we advise admissions committees to use both when evaluating candidates.

How reliable are GMAT scores?

Test scores actually earned on any given occasion are only an approximation of your true ability. However, our research indicates that you will most likely earn a Total score within about 30 points of a score reflecting your true ability. Your Verbal and Quantitative scores are probably within 2.9 points of your true scores. If you take the GMAT exam more than once, you probably will not receive exactly the same scores. "Reliability" indicates the degree to which you would keep the same score if you were to take the test more than once (perfect reliability is 1.00). The average reliability of the GMAT Total score is 0.93. Average reliability is 0.87 for the Verbal score and 0.90 for the Quantitative score. Therefore, the reliability of GMAT scores is very high.

How long are my GMAT scores valid?

Scores are usually reported up to five years from the date you took the exam. With a special request and for an additional fee, you may report scores up to 10 years from the date you took the exam. However, scores more than five years old will be accompanied by a statement indicating that they must be

interpreted with care; many institutions will not accept scores over five years old. On behalf of GMAC, Pearson VUE destroys all score records more than 10 years old.

How should my scores be used?

Admissions committees typically use GMAT scores in conjunction with your academic record(s) and other information obtained from application materials. Unlike academic grades--which vary in meaning according to the grading standards of each school--GMAT scores are based on the same standard for all test takers and can be compared across all GMAT test administrations.

It is appropriate for GMAT scores to be used as an admissions tool for graduate study in management or as a basis for selecting applicants for financial aid based on academic potential. GMAT scores should not be used as a requirement for awarding a job; as a requirement for employment, job licensing or certification, or job-related rewards such as raises or promotions; or as an achievement test.

How do I send my scores to schools?

Approximately 20 days after your test date, your Official Score Report, including the digital photograph you provided at the test center and copies of your essays, are made available to any graduate management program you designated when you took the GMAT exam. Not all graduate management programs elect to receive photographs and essays. Once scores are made available, a school you designate can access your scores at any time. If you have not yet designated schools to receive your scores, or if you want to designate additional schools, visit www.mba.com or call GMAT Customer Service. We will report results from all tests you took in the last five years.

Who has access to my scores?

Score reports, which include copies of essays and a digital photograph if a designated graduate management program has elected to receive them, are released only at your specific request--either when you take the test, or when you request an Additional Score Report (ASR)--unless required by law, to cooperate in judicial or governmental proceedings, as necessary to detect or prevent unlawful activity, or as otherwise provided in the Privacy Policy on www.mba.com/privacy and in the *GMAT Handbook*.

Should I decide where to apply based on my scores?

You may be doing yourself a disservice if you rely solely on your GMAT scores to decide where to apply, or even whether to apply at all. Schools treat GMAT scores as only one of several predictors of performance. Most schools publish average and mid-80% range scores for the students they admit. Averages can be skewed by unusually high scores. For that reason, you can generally get a better understanding of the types of GMAT scores a school typically admits by looking at the mid-80% range, which indicates the scores earned by 80% of students who were admitted.

How will retaking the GMAT exam affect my chances of admission?

Admissions committees treat multiple scores in a variety of ways. They may use only your highest scores, your most recent scores, or an average of your scores. You should contact schools directly to learn how they use multiple GMAT scores.

Can I now cancel my scores?

You can cancel your scores only at the test center *immediately after you take the test*. Once your scores have been reported, they become part of your permanent score record and cannot be canceled.

About Your GRE® Score Report

Score Reporting Policies

With the *ScoreSelect®* option, you can decide which test scores to send to the institutions you designate. There are three options to choose from:

- Most Recent option – Send your scores from your most recent test administration
- All option – Send your scores from all administrations in the last five years
- Any option – Send your scores from one OR as many test administrations in the last five years (this option is not available on test day when you select up to four FREE score reports)

Scores for a test administration must be reported in their entirety. Institutions will receive score reports that show only the scores that you selected to send to them. There will be no special indication if you have taken additional GRE tests. See the *GRE® Information Bulletin* for details. The policies and procedures explained in the Bulletin for the current testing year supersede previous policies and procedures in previous bulletins.

Scores will be sent to designated score recipients approximately 10-15 days after a computer-delivered test and 5 weeks after a paper-delivered test. If your scores are not available for any reason, you will see "Not Available" in Your Test Score History.

GRE test scores are reportable according to the following policies:

- For tests taken prior to July 1, 2016, scores are reportable for five (5) years following the testing year in which you tested (July 1 – June 30). For example, scores for a test taken on May 15, 2015, are reportable through June 30, 2020. GRE scores earned prior to August 2011 are no longer reportable.
- For tests taken on or after July 1, 2016, scores are reportable for five (5) years following your test date. For example, scores for a test taken on July 3, 2016, are reportable through July 2, 2021.

Mehar Sindhu**Most Recent Test Date: August 28, 2019****Date of Birth:** January 30, 1999

Registration Number: 6008255

Print Date: September 9, 2019

Note: Score recipients will only receive scores from test administrations that you have selected to send to them.

Percentile Rank (% Below)

A percentile rank for a test score indicates the percentage of test takers who took that test and received a lower score. Regardless of when the reported scores were earned, the percentile ranks for General Test and Subject Test scores are based on the scores of all test takers who tested within the most recent three-year period.

Retaking a GRE Test

You can take the GRE® General Test *once every 21 days*, up to *five times* within any continuous rolling 12-month period (365 days). This applies even if you canceled your scores on a test taken previously. You can take the paper-delivered GRE General Test and GRE® Subject Tests as often as they are offered.

Note: This policy will be enforced even if a violation is not immediately identified (e.g., inconsistent registration information) and test scores have been reported. In such cases, the invalid scores will be canceled and score recipients will be notified of the cancellation. Test fees will be forfeited.

For More Information

For information about interpreting your scores, see *Interpreting Your GRE Scores* at www.ets.org/gre/understand.

For detailed information about your performance on the Verbal Reasoning and Quantitative Reasoning sections of the computer-delivered GRE General Test, access the free GRE Diagnostic Service from your ETS account. This service includes a description of the types of questions you answered right and wrong, the difficulty level of each question, and the time spent on each question. This service is available approximately 15 days after your test administration and for six months following your test administration.

If you have any questions concerning your score report, email GRE Services at gre-info@ets.org or call 1-609-771-7670 or 1-866-473-4373 (toll free for test takers in the U.S., U.S. Territories and Canada) between 8 a.m. and 7:45 p.m. (New York Time).

Reading Skills	Level	Your Performance
Reading	High	Test takers who receive a score at the HIGH level, as you did, typically understand academic texts in English that require a wide range of reading abilities regardless of the difficulty of the texts. Test takers who score at the HIGH level, typically - have a very good command of academic vocabulary and grammatical structure; - can understand and connect information, make appropriate inferences, and synthesize ideas, even when the text is conceptually dense and the language is complex; - can recognize the expository organization of a text and the role that specific information serves within the larger text, even when the text is conceptually dense; and - can abstract major ideas from a text, even when the text is conceptually dense and contains complex language.

Listening Skills	Level	Your Performance
Listening	High	Test takers who receive a score at the HIGH level, as you did, typically understand conversations and lectures in English that present a wide range of listening demands. These demands can include difficult vocabulary (uncommon terms, or colloquial or figurative language), complex grammatical structures, abstract or complex ideas, and/or making sense of unexpected or seemingly contradictory information. When listening to lectures and conversations like these, test takers at the HIGH level typically can - understand main ideas and important details, whether they are stated or implied; - distinguish more important ideas from less important ones; - understand how information is being used (for example, to provide evidence for a claim or describe a step in a complex process); - recognize how pieces of information are connected (for example, in a cause-and-effect relationship); - understand many different ways that speakers use language for purposes other than to give information (for example, to emphasize a point, express agreement or disagreement, or convey intentions indirectly); and - synthesize information, even when it is not presented in sequence, and make correct inferences on the basis of that information.

Speaking Skills	Level*	Your Performance
Speaking about Familiar Topics	Good	Your responses indicate an ability to communicate your personal experiences and opinions effectively in English. Overall, your speech is clear and fluent. Your use of vocabulary and grammar is effective with only minor errors. Your ideas are generally well developed and expressed coherently.
Speaking about Campus Situation	Good	Your responses indicate an ability to speak effectively in English about reading material and conversations typically encountered by university students. Overall, your responses are clear and coherent, with only occasional errors of pronunciation, grammar, or vocabulary.
Speaking about Academic Course Content	Good	Your responses demonstrate an ability to communicate effectively in English about academic topics typical of first-year university studies. Your speech is mostly clear and fluent. You are able to use appropriate vocabulary and grammar to explain concepts and ideas from reading or lecture material. You are able to talk about key information and relevant details with only minor inaccuracies.
Writing Skills	Level*	Your Performance
Writing based on Reading and Listening	Good	You responded well to the task, relating the lecture to the reading. Weaknesses, if you have any, might have to do with - slight imprecision in your summary of some of the main points and/or - use of English that is occasionally ungrammatical or unclear.
Writing based on Knowledge and Experience	Good	You responded with a well-organized and developed essay. Weaknesses, if you have any, might have to do with - use of English that is occasionally ungrammatical, unclear, or unidiomatic and/or - elaboration of ideas or connection of ideas that could have been stronger.

* Skill levels for speaking and writing individual skills are estimates of performance at the *item* level. The total writing and speaking scaled scores and ranges are more accurate. Therefore it is not appropriate to combine the individual skill levels. Doing so may lead to apparent inconsistencies between the diagnostic feedback and reported writing and speaking scores.
