Activity Report

On 23rd September, 2025 the Involucre Society of the Department of Botany hosted its inaugural seminar for 2025, bringing together students, faculty, and a distinguished guest lecturer in a session that blended science, inspiration, and personal journeys.

Opening Ceremonies & Welcomes :

The seminar began on a traditional note with the recitation of Saraswati Vandana, followed by the lighting of the kuthu vilakku by the guest lecturer, Prof. Dinabandhu Sahoo. As a token of respect and gratitude, he was presented with a plant pot as a memento by the Event in-charge, Dr Sunita Yadav.

She then welcomed the gathering warmly, followed by the Dr Pooja Gokhale Sinha, who extended greetings to faculty, students, and guests, while expressing hopes for a year of meaningful academic activities.

Presidential Address :

The President of the Involucre Society, Aayushi Nani then took the stage, reflecting on the society's achievements in the past year — from academic sessions to interactive workshops. Their address emphasized the society's aim of creating a vibrant space for botanical learning and collaboration.

Introduction of Guest Lecturer :

Dr Aditi Kothari Chhajer introduced the guest of honor, Prof. Dinabandhu Sahoo, highlighting his scholarly contributions, pioneering research, and leadership roles. Her words set the stage for an engaging keynote.

Keynote Address — Prof. Dinabandhu Sahoo :

Prof. Sahoo began his talk with the pressing issue of the "Triple Planetary Crisis"—climate change, biodiversity loss, and pollution. To underline its immediacy, he cited the deteriorating condition of the Yamuna River and Delhi's worsening air quality as examples of environmental crises unfolding in real time. He urged young minds to acknowledge these realities and to think critically about sustainable solutions.

He then recounted his own journey as a researcher, including becoming the first Indian PhD student to travel to Antarctica. Sharing anecdotes from that expedition, he described the harsh yet awe-inspiring environment and the scientific insights gained there. His story stood as a testament to courage, perseverance, and the willingness to step into uncharted territory.

From there, he expanded on his life achievements, encouraging students to carve their own paths and never shy away from opportunities. He spoke about the algae Porphyra, detailing its value in the food industry and its ecological importance. He also emphasized how seaweeds absorb more CO_2 than terrestrial plants, underscoring their potential role in mitigating climate change.

Prof. Sahoo further touched on initiatives that bridged science with society, notably the Cherry Blossom Festival, which he pioneered, and the establishment of an orchidarium, both of which showcase the harmony between biodiversity, culture, and conservation

Closing his lecture under the theme "Decide Fearlessly," he urged the audience to trust in doing the right thing even when it's difficult. He quoted Marie Curie:

- "You must never be fearful of what you're doing when it's right."

His words left the audience deeply motivated to pursue their academic and personal journeys with clarity and courage.

Vote of Thanks & Closing :

The Vote of Thanks was delivered by Dr. Navneet Kumar , who acknowledged Prof. Sahoo, the organizers, and the participants for making the seminar a success. The event concluded with the National Anthem, marking a dignified close to the evening.
